

This technical floor plan illustrates the interior layout of a vehicle, likely a bus or truck. The plan shows a long, narrow cabin with a driver's seat at the front (top right). The seating area is divided into two main sections: a front section with two rows of seats and a rear section with two rows of seats. A central aisle runs through the middle of the cabin. Storage compartments are located along the side walls, and a large storage area is visible at the rear. A blue rectangular area is highlighted in the bottom left corner, possibly indicating a specific equipment or storage location. A green rectangular area is highlighted in the top right corner, near the driver's seat. A pink line is drawn across the middle of the cabin, and a green line is drawn along the right side wall.
